Continuing Education Attendance Tracker

Powered by Smart Label Solutions

Today's class information is likely to be collected on paper. The collected class information flows up to the Continuing Education department where it is aggregated and loaded into tracking software so reporting, records and certifications can be kept. The class data collection effort can take time and occasionally lags the actual class data. There is a solution. A system by which each department, or group of departments, collects the attendee and class data electronically. A one button upload sends the file to the Continuing Education department. Tracking a non continuing education class? That file stays on the department administrators system for internal use.

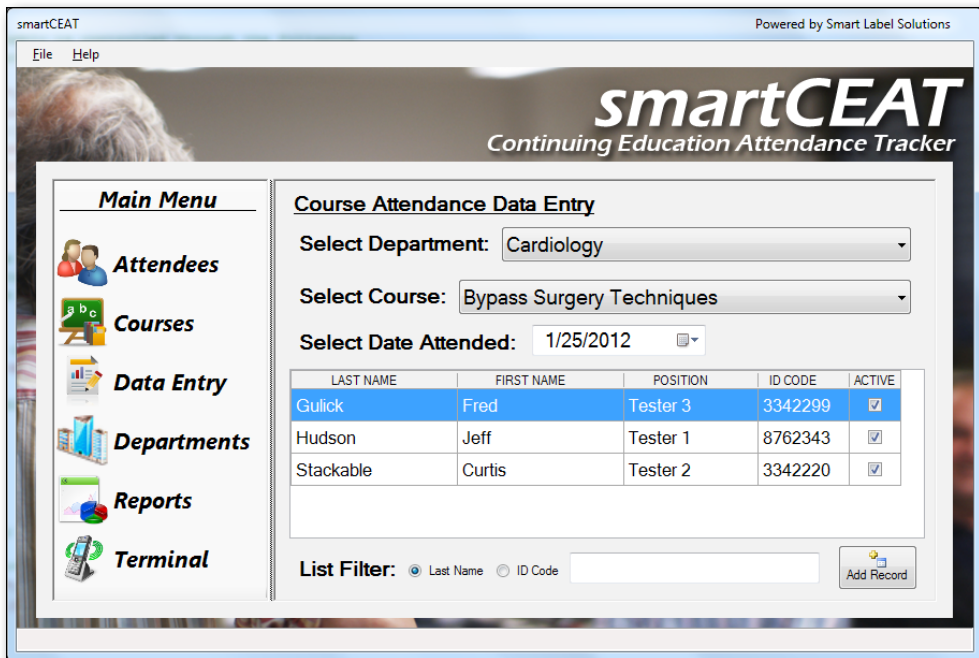

Future-proof Your Investment with Open Systems

Smart Label Solutions *smartCEAT* software is built with openness in mind.

- › RFID, barcode or magnetic stripe badge support
- › Multiple hardware vendors supported
- › Integrates with Microsoft® Office to automatically create and email Excel spreadsheets
- › Microsoft® .NET Architecture

<i>smartCEAT</i> Feature	<i>smartCEAT</i> Benefit
Replace the sign in sheets	Much less clutter and easier to keep track of
Handheld terminal	Most accurate, easy way to collect the data
Use current badges	Scan by RFID, barcode or magnetic stripe
Extend the handheld use	Set up continuing and non continuing education classes for data collection
Batch data collection	No wireless worries and off site collection if necessary
One button up load	Get class data uploaded very quickly
Microsoft® Office Integration	Automatically create and email Excel spreadsheets
.Net Architecture	Open development standards
Microsoft® SQL Compact Database	Industry standard and open database
Reporting	Four built in Attendance/Attendee reports

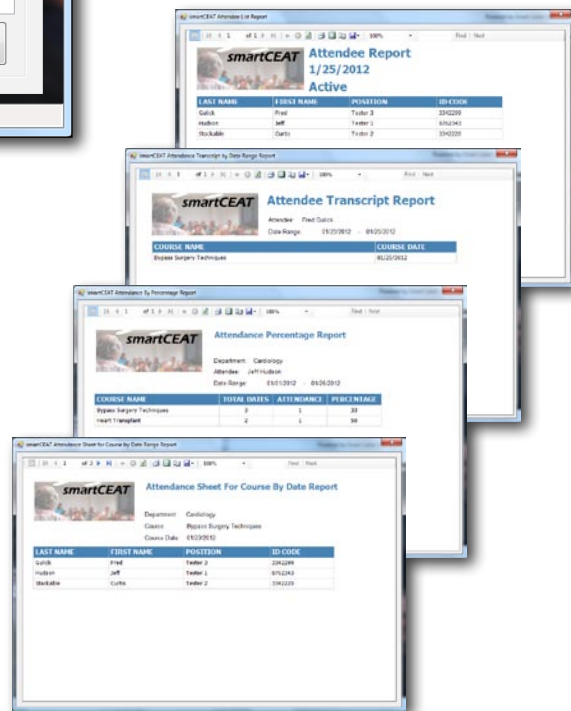

smartCEAT Administration Client

- Intuitive, easy to navigate screens allows you to easily locate and modify course information.
- Track course duration for CEU credits.
- Track CME and NON-CME courses.
- Create and modify departments.
- Easy, one button upload from terminal.
- Microsoft® Office integration for creating and emailing Excel spreadsheets.
- Microsoft® SQL Compact database
- Microsoft® .NET architecture
- Built in Attendance/Attendee Reports

smartCEAT Mobile Client

- Supports Windows® Mobile devices from various manufacturers
- Register class attendees remotely from the mobile computer
- Connects to the administration client via USB
- Leverages Microsoft® SQL Compact Database
- Supports RFID, barcode and magnetic stripe badge reading

Smart Label Solutions, LLC combines hardware products from leading manufacturers with our suite of RFID and barcode software products. We are partnered with leading manufacturers of RFID and barcode hardware to provide our customers with best in class products. We deliver customer focused solutions that provide improved accuracy and efficiency to your existing business processes.
